

MIRKA

NEW!
Wet & Dry

Flexible, fast and friction-free sanding

WPF Next Gen.

- Flexibility to suit all curved surfaces
- Fast sanding to increase productivity
- Friction-free for optimal scratch pattern
+ Long lifetime for cost effectiveness

WPF Next Gen.

Sand smoother for a superior surface finish.

When you need smooth and efficient hand sanding, reach for WPF Next Gen. Flexible, fully waterproof and with great grain adhesion, this sandpaper can be used for both wet and dry sanding. The new coating technology ensures the abrasive surface does not clog up. Expertly dotted on the surface, the grains and resin leave precise gaps on the latex paper backing where the dust is not able to stick. Now you can sand faster and the abrasive last longer. The finer grits are optimal for fresh clear coats and make polishing easier.

Technical specifications	Mirka® WPF Next Gen.
Grain	Aluminium oxide
Colour	P60–P1000, Green P1200–P2500, Mustard
Backing	B-paper
Bonding	Resin over resin
Grit range	P60–P2500
Coating	Semi open / Closed
